Yes, we will definitely go with the shorter URL as soon as it's in business.

That's awesome—I love it!

In the morning, can we change the link at the bottom of your email reply to this:  
<http://www.epa.gov/goldkingmine?>

Thanks!

Also, if anyone sends an email to that email address, they are going to get the following “blanket” response (with the exception of press people who will be provided with the next press

conference info – if we have it):

EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife.

Please see our website for the latest information: <http://www2.epa.gov/region8/gold-king-mine-release-emergency-response>

Regular updates will be posted as they are available.
